Dear Sir/Madam,

The companies Broadcom Inc., Cisco Systems Inc., Hewlett Packard Enterprise (HPE), Meta Platforms Ireland limited and Microsoft welcome NKOM's invitation to provide a written response to the public inquiry titled "Choosing the path for frequency management towards 2030".

The mentioned companies would like to provide input for NKOM's assessment of the need for more radio resources for use by licence-exempt technologies, and respectfully ask NKOM to endorse a position of "No Change" for the upper 6 GHz band discussed in Agenda Item 1.2 at WRC-23.

The complete response is contained in the attached document.

Kind regards,  
Pasquale Cataldi
